www.angels-initiative.com

The Angels education platform is aligned with our goal of **changing outcomes for stroke patients**. Learning resources in the Angels Academy therefore target actions that raise the standard of stroke care in **any hospital, anywhere in the world**.

Develop your skills and expand your knowledge
– **in your own time and at your own pace.**

You can also set targets and **track your progress**, design learning paths for members of your team, or invite colleagues to join you – **because a community that learns together, excels together.**

HYPERACUTE PHASE

Acquire tools to help your hospital reduce the time to treatment and reduce disability and mortality.

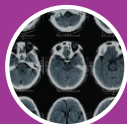

OPTIMIZING THE HYPERACUTE PATHWAY

Video-based learning about 4 key actions that eliminate treatment delays.

CT IMAGING

Improve therapeutic decision making with this standardized approach to interpreting CT images.

CT SIMULATION WITH E-ASPECTS

An interactive training tool that increases sensitivity in identifying early signs of ischemic damage by up to 50 percent.

4 STEPS TO TREATMENT DECISION

Learn a 4-step approach to standardizing the hyperacute decision-making process, and improve recanalization rates.

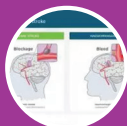

DECISION MAKING SIMULATION WITH BODY INTERACT FOR PHYSICIANS

Virtual patient simulator training to test and improve your clinical reasoning and decision-making skills.

NIHSS ONLINE TRAINING COURSE

A refresher course for NIHSS-certified HCPs to enhance their proficiency in using the scale to evaluate stroke patients.

IMPLEMENTING STROKE BASICS FOR PHYSICIANS

Organize your knowledge of stroke, master the key issues that influence patient outcomes, and learn how to effectively implement guidelines in daily clinical practice.

INTRACEREBRAL HEMORRHAGIC STROKE (ICH) COURSE

Expand your knowledge of the management of intracerebral hemorrhage based on international guidelines. The course includes videos featuring experts and short quizzes.
